SKILLS

TECHNICAL
Lanuages & Frameworks:
Javascript • PHP • Python • Html/Css
NodeJS • C# • Typescript • MySQL
Laravel • VueJS • React • Express
Tailwind • Bootstrap • Redis • Next
PostgreSQL
Misc:
Linux • Vim • AWS • Docker • Git
Unity3D • DigitalOcean • Netlify

CERTIFICATES

• Customer Relationship Management from NSDC, Gov of India
• ASP.NET from BSNL
• ASP.NET from WAE

PARTICIPATIONS

• FPS Survival Game created for workshop showcase at college.
• Won Inter college coding compitition held at Arya College

FUN FACTS

INTERESTS
Coding • Listening • Startups

HOBBIES
Gaming • Music • Books

WORK EXPERIENCE

CASHBOOK | Backend Engineer
March 2022 – Present | Bengaluru, Karnataka, India
- Develop: Orchestrating backend development for UPI and Card-based Payments, showcasing expertise in crafting robust payment solutions.
- Lead: Steering the design and implementation of an Invoice and Vendor Management System for an NBFC, optimizing efficiency in financial systems.
- Utilize: Leveraging cloud functions and Firebase services to optimize system performance and enhance overall efficiency.
- Establish: Created a test framework for cloud functions, streamlining the continuous integration (CI) workflow for secure and efficient deployments.

HABILELABS PVT LTD | Full Stack Developer
March 2019 – March 2022 | Jaipur, Rajasthan, India
- Optimize: Elevated project performance by optimizing slow responding APIs up to 10X through strategic caching, code refactoring, and index enhancements.
- Reduce: Significantly reduced the time complexity of an employee scheduling algorithm from 5 minutes to 30 seconds, leveraging Google OR Tools in Python.
- Demonstrate: Exhibited full-stack proficiency in driving impactful improvements across various project components.

FRAGPLUS.COM | Server Developer & Customer Relations
Feb 2018 – Feb 2019 | Remote
- Establish: Deployed and managed dedicated and game servers, swiftly addressing and resolving customer issues to ensure seamless gaming experiences.
- Create: Develop Mods for games like Minecraft, Swat4, and Cod4.
- Design: Designed, developed & deployed the landing & order page.

PERSONAL PROJECTS

MINETRAX ANALYTICS SUITE | minetrax.github.io
- Website for Minecraft which can track and rank players of servers. More features includes shoutbox, Oauth, feed, statistics, etc.
- Plugin helps in communication with the game server and the web. It uses encrypted TCP-based custom protocol.
- Web created using Laravel, Vue & Socket, plugin with Java.

KNIGHTOFSORROW COMMUNITY FORUM | owly.lol/xl709cy
- Created both front and backend of Web Application for Swat4 gaming community with features like In-Game Player Tracker, In-Game ChatFeed, Auth, Shouts, Posts, Follows, Tournaments System, Global Bans etc.
- Created custom mods for swat4 which talk to website using UDP.

OWLY URL SHORTNER | owly.lol
- A Wordable, non-case sensitive URL shortner with some tweaks for personal taste. Created while learning React & Next.
